## **APPROVED CONTRACTOR**

Council will not accept your application without an agreement with an Approved Contractor.

A list of approved contractors and their contact details can be found on the MDC website. You must nominate one of these approved contractors. The selected contractors know the methods and material required by the Manawatu District Council and it is a condition of this consent that they do the work to Council's specification. Upon completion of the work the nominated contractor is to supply Council with the as-built information.

Do not begin work until you receive approval from the Council with any conditions and specifications and you have notified the Council who your approved contractor is.

The contractor must carry out all associated work. The contractor will need a copy of the permit with any conditions and the approved site plan with them on site.

#### **DRAINAGE PLANS**

Please attach the site drainage plans which should indicate:

- For all connections clearly show the measurement in metres to the nearest boundary.
- Layout and details of stormwater drains, subsoil drains, sumps and ancillary work.
- Layout and details of wastewater drains and ancillary work. The required pipe invert level at the boundary must be specified.
- Layout and details of water mains and ancillary work.
- Diameters of pipe connections (stormwater, water and sewer).
- Trees.
- The positions of the proposed connections together with marked distances to the nearest boundaries.

#### Note:

A detailed site plan showing property boundaries, existing services, and the proposed works must be attached to this application. The application cannot be approved without a plan.

The plan must show the preferred position of the connection, or the location of the connection to be removed, together with marked distances/measurements to the nearest boundaries (if a corner site, nominate street from which connection is to be taken).

#### MANAWATU DISTRICT COUNCIL SERVICE APPLICATION NOTES

**Wastewater – Special Requirements:** this will usually relate to commercial or industrial property. Some businesses may need a trade waste consent. Some may require grease traps or oil interceptors on their wastewater connection or require a manhole. For more information please refer to the Engineering Standards for Land Development or Trade Waste Bylaw on the MDC website.

**Backflow prevention device:** All properties connecting to the water supply will require an appropriate backflow prevention device. The type of device will depend on the level of risk. Properties are classified into three categories of risk and this will determine the type of backflow device required. High risks will require a reduced pressure backflow device, medium risks will require a testable double check valve backflow device and low risks will require either a registered air gap, a hose connection vacuum breaker or an approved manifold with backflow prevention function.

## Please be aware:

- Council may require aged connections to be removed which will be at the developer's/applicant's expense.
- Some commercial and residential properties may require a stormwater backflow prevention device. The Council is not liable for any backflow associated costs.
- Any backflow prevention device and/or water meter installed will be at the developer's/applicant's expense.
- Position of the approved service connections must not be altered on site without specific written approval.

| FEES (INCLUDES GST)   |  | NUMBER OF<br>CONNECTIONS | FEE        | TOTAL              | STANDARD CONNECTION SPECIFICATION   |  |
