Kia ora

I refer to your official information request dated 6 February 2025 for information about conservation efforts within the Tararua District.

While our district council is responsible for community services in this area, such as road maintenance, drinking water provision, wastewater services, libraries, community facilities, and provision of regulatory services such as building controls and planning, the regional council's responsibilities include ensuring sustainable use of the region's natural resources. The regional council for this area is the Horizons Regional Council, and a good place to start would be the following page on their website: [Managing Natural Resources - Horizons Regional Council](#)

There are also many parts of our district that fall under the auspices of the Department of Conservation, so a search on their website may help too: <https://www.doc.govt.nz/>

All the best for your return to this region.

Ngā mihi

Kia Ora,

I have been looking through your website for information on conservation and environmental actions that are underway in this region? I was local to this area up until university at which time I moved on to pursue an environmental based career. My current role as a senior ranger is due to end soon and I will be returning to the region. As a result of this it sparked interest on what conservation work is in the pipeline or ongoing. Would love to chat further about this or hear any recommendations on who to speak to about looking after the flora and fauna in our local area.

Thanks,
 [REDACTED]
